RHODODENDRONS - WHOLESALE

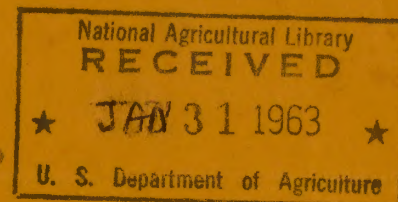

LINERS

As this is being written our cuttings are rooting nicely. They will be transplanted for growing on, and disbudded as they push, to make husky, branched, liners ready for shipment by about June 1, as soon as their first flush of growth has hardened up.

These should not be confused with "rooted cuttings" as they have been transplanted, fertilized and developed into stocky little plants all ready to make a good start in the lath house. We actually propagated many additional varieties, in small lots, so ask for any not listed -- we may have them.
